Introduction and Vision

Our aim is to develop a game that seamlessly blends GameFi and social elements, using burgers, fries, and drinks (BFD) as the core business theme. By integrating commercial gaming with blockchain technology, we envision a future where BFD tokens replace traditional currencies in the catering industry.

In the initial phase, we are leveraging key features of contemporary DeFi platforms to create a game centered around a simple sliding mechanism, offering our community equitable mining opportunities.

Gameplay Overview

Mining Robots:

Telegram bots used for mining and token distribution

Airdrops:

Early players have the opportunity to receive BFD tokens and NFT airdrops from the BFD community.

Decentralized Governance:

BFD token holders have voting rights and can participate in the future development direction of the platform.

Other features:

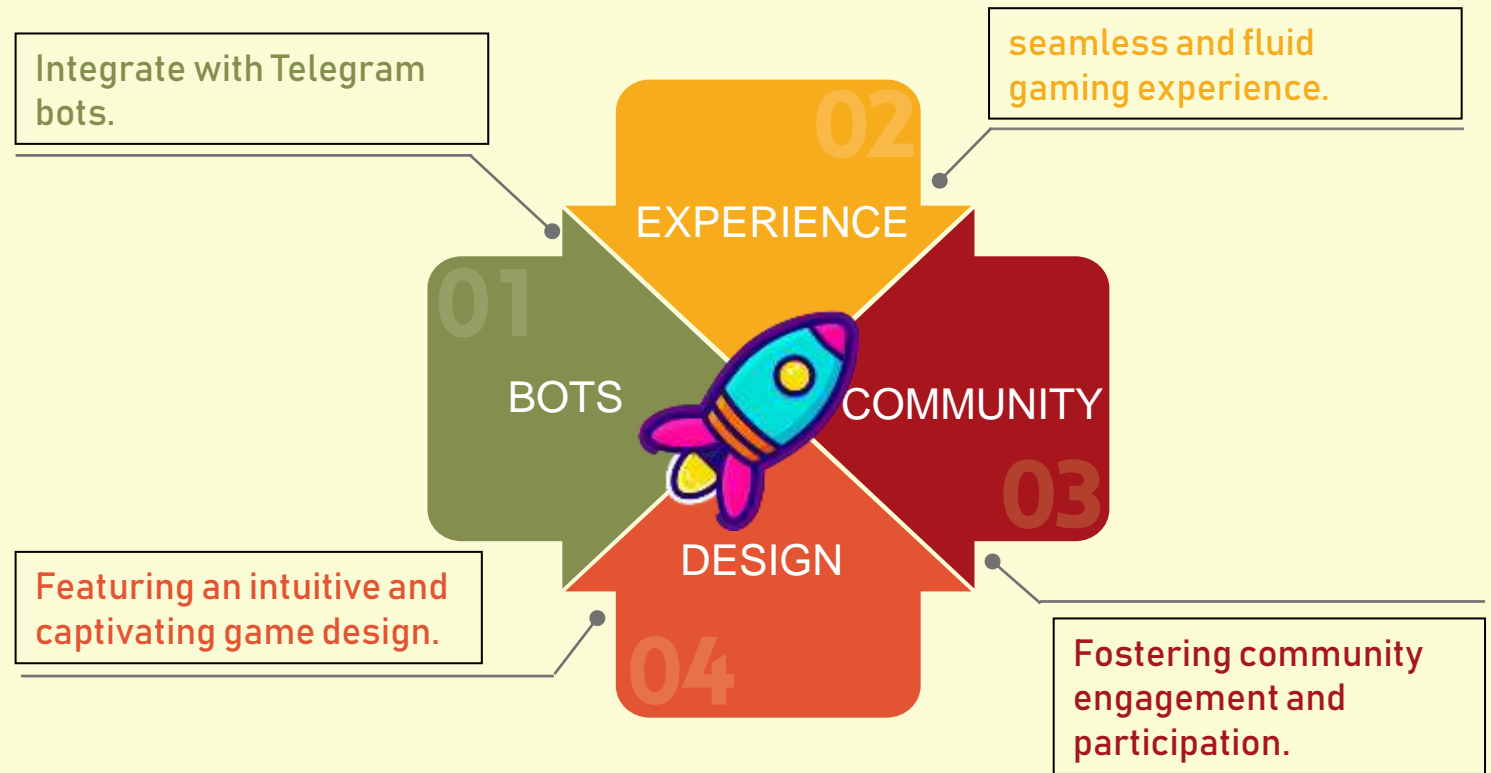

Liquidity pools, margin trading, etc.

"Swipe to Earn" Model

Introducing our innovative "Swipe-to-Earn" model, designed to attract users to Telegram through a fun and engaging sliding game. This unique approach transforms the simple act of swiping into an opportunity to earn rewards, making it easy and enjoyable for users to participate.

TIMELINE INFOGRAPHICS

Q2-Q3 2024

Launch BFD Coin Game

Launch and develop the Telegram BFD-themed casual gaming community. Utilize the "slide to earn" model to attract our first wave of users.

Airdrop, Exchange Listing, Staking

Q4 2024

List project tokens on leading cryptocurrency exchanges, initiate token airdrops, and reward early users and community contributors. Enable token staking functions with an estimated annual return rate of 50%-100%, subject to the actual number of participants.

Roadmap

BFD Coin Catering Revolution

Under a collaborative effort with major players in the catering industry, we are promoting a groundbreaking business model that replaces traditional currency payments with BFD Coin tokens. This initiative aims to revolutionize the payment landscape within the catering sector, offering a seamless, efficient, and secure transactional experience. By leveraging the advantages of digital currency, we anticipate BFD Coin will set a new standard in catering transactions, enhancing convenience for both businesses and customers.

Q1 2025

Open NFT studio and airdrop

Introducing our official DIY Original Game Room NFT, accompanied by an exclusive airdrop for early users. This initiative offers a pioneering experience within our meticulously designed game space.

Q2 2025

Q3-Q4 2025

BFD Payment Launch

The official launch of BFD's new payment system has been announced.

Token Economics

Token Economics

There will only ever be 5 trillion BFD tokens in existence and the mining output will be halved every quarter. After BFD Coin is listed, the community's advertising fees and other commercial income will all be used to repurchase tokens and destroy them, ensuring that the coin price rises.

61%

AIRDROP

The BFD Coin development and operations team holds no tokens. All tokens are allocated for airdrops, staking rewards, and ecosystem maintenance, adhering strictly to the principle of fairness. In order to ensure the price stability of the currency, BFD Coin will not airdrop all the tokens at once, but will give priority to airdropping a portion of the tokens to the top 100,000 coin holders.

32%

STAKING REWARDS

32% is used for staking rewards.

5%

LIQUIDITY

In Q4, BFD Coin liquidity will be increased through the introduction of staking opportunities and the availability of accelerator shares for purchase. These measures are part of our strategic plan to enhance BFD Coin's liquidity and strengthen its position within the market.

2%

ECOSYSTEM

2% is used for ecosystem maintenance to ensure the normal operation of the ecosystem.
